## Summary

Full-stack engineer building production-grade tools across Web3, AI, and cloud-native ecosystems. Experienced in architecting full-stack apps with TypeScript, Next.js, and Docker. Strong contributor to open-source and fast-moving remote teams.

## Education

**C.V Raman Global University**, B.Tech in Computer Science                    Oct 2021 – Apr 2025

- CGPA: 8.0/10.0
- **Coursework:** Software Testing , Database , Data Structures and ALgorithms , Web Technologies

## Experience

**Full Stack Developer**, Quranium – Remote,                    Apr 2025 – Present

- Integrated 4+ smart contracts into a live DEX product, enabling secure swaps and liquidity pooling.
- Collaborated across backend/frontend teams to ensure seamless API integration and app performance
- Optimized front-end data fetches, reducing latency by  30 percent

**Front-End Developer Intern**, Claw Enterprises – Remote                    July 2024 – Sep 2024

- Led the redesign of an AI-integrated courtroom platform using React.js and TailwindCSS
- Implemented responsive UI and smart UX features across all major screen sizes
- Integrated Redux Toolkit to manage complex state and data synchronization

## Projects

**Neurobase**

- AI-powered developer tool to query **Postgres** and **MongoDB** in **natural language**.
- Built modular agent-based architecture with Vercel AI SDK
- Supports SQL and NoSQL with query traceability and error feedback
- Stack: Next.js, TypeScript, PostgreSQL, MongoDB, Docker
- **Links: Github - Live Link**

**XcuseHub**

- AI-powered platform that roasts and reviews developer portfolios (GitHub + resume) with brutal honesty.
- Built a full-stack app where devs upload resumes and GitHub profiles for sarcastic, AI-generated feedback
- Used **Go** for backend services including file parsing, API routing, and LLM interaction
- Stack: Go, Next.js, Golang, TypeScript, Gemini API, Vercel, ShadcnUI

**TeamUp**

- Developed a platform where users **post gigs and apply** based on matching skillsets
- Built a **matching system** to recommend gigs by comparing user skill profiles
- **Tech Stack:** Nextjs , MongoDB , Clerk , Nodemailer , ShadcnUI

## Technologies

**Languages & Frameworks:** JavaScript, TypeScript, C++, Java, Go, React.js, Next.js, Node.js, Express.js

**Tools & Platforms:** PostgreSQL, MongoDB, PouchDB, AWS, Vercel, Firebase, Git, Supabase, Linux, Tailwind CSS
